May 15, 2008

CITY, GENERAL DEGAULLE DRIVE – RED OAK COURT MANHOLE RESTORATION FIELD TRIAL

Virginia based company is offering a new, faster way to deal with sunken and worn out manholes

In an effort to assist the City of New Orleans with its ambitious road construction and restoration program, Global Manhole Restoration and Service Company LLC (GMRS LLC) is conducting a field trial for the Department of Public Works in cooperation with Global Field Services LLC, a Louisiana company. The City has not entered into a contract with GMRS LLC or its affiliates yet, but the company is delighted to offer a free trial and demonstration of the revolutionary manhole restoration process it can offer.

Live demonstrations of the complete manhole restoration process can be viewed on May 22, 2008 starting at 11:00 AM at the following location:

3725 Red Oak Court, West bank, New Orleans

The patented Manhole Restoration Process offered by GMRS LLC is the most efficient solution on the market today, saving time and money in the restoration process while using a special type of environmentally friendly cold asphalt made by the Austrian manufacturer VIALIT (www.vialit.com) – a highly innovative and successful Austrian company with customers such as BMW, the Vienna Airport and Austrian Road Building Departments.

GMRS LLC is a subsidiary of M Nettek International Inc. The GLOBAL system has been successfully implemented in Europe for over 11 years. MNI Inc's sister company in Austria has restored well over 15,000 manholes in the past 11 years with great success. The restorations are easy to perform and are saving time and expenses compared to traditional processes while offering extraordinary durability and performance. More information including a video of the restoration process is available at www.mnettekinternational.com.

The company's CEO, Mr. Nettek, a crew of US and European specialists as well as two representatives of VIALIT will be attending the field trial personally.

For more information please call 540-832-0609. We are looking forward to meeting the press at this event.
