Active Rust Primer 662 SG

Nortrade's representative, who introduced us to the Active Rust Primer 662 SG product, asked us to provide feedback regarding our experience with selling the product to our retail customers in the last two years.

Feedback from our customers has been very good – they are particularly satisfied with the fact that the product is extremely effective and easy to use. The price is also competitive considering the positive results. The customers further appreciate that the product can be used on any metal surface as well as directly over both rust and existing paint with easy preparation.

We are very satisfied with the sales so far in regards to price, profits and our happy customers.

Based on the experience we have had selling directly to the end consumer, we can absolutely recommend the Active Rust Primer 662 SG to other companies and retail customers.

~~Yours sincerely,~~
